DETAILED ACTION

Claims 12-18,27-33 are currently pending.

Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claim 27, drawn to method of treating demens, classified in class 514, subclass 02+.
- II. Claim 27, drawn to method of treating hereditary cerebral hemorrhage, classified in class 514, subclass 02+.
- III. Claim 29, drawn to method of inhibiting fibril formation *in vivo*, classified in class 514, subclass 02+.
- IV. Claims 12-18, 30,33, drawn to method of inhibiting polymerization of amyloid peptide, classified in class 514, subclass 02+.
- V. Claim 31, drawn to method of treating Alzheimer disease, classified in class 514, subclass 02+.
- VI. Claim 32, drawn to method of inhibiting polymerization of amyloid peptide-ligand, classified in class 514, subclass 02+.

The inventions are distinct, each from the other because of the following reasons:

Methods of Groups I-VI are patentably distinct because they are not disclosed as capable of use together, or they have different modes of operation, or they have

different functions, or they have different effects. For example, a method of inhibiting polymerization of amyloid peptide is independent from method of inhibiting polymerization of amyloid peptide to a ligand or from a method of treatment of a disorder such as hereditary cerebral hemorrhage; methods of treatment of distinct disorder conditions of groups I, II, V are patentably distinct because the disorder conditions are not immediately related to each other, have different mechanisms of development and etiology, and the methods of treatment have different enablement requirements. The Groups require different literature search and a reference teaching one method (e.g., treatment of hemorrhage) will not teach treatment of another other disorder (e.g., preventing demens).

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

Species Requirement

Election of species should be required prior to a search on the merits in all applications containing both species claims and generic or Markush claims.(MPEP 808.01(a))

Upon election of any single one of the Groups from above the following election of species is hereby required for the initial search for examination on merits:

The claims of Groups are generic to a plurality of disclose patentably distinct species of peptides a plethora of different compound species that require a burdensome classification, and/or bibliographic, manual and computer search. Accordingly, regardless of which group is elected, Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (i.e., a single compound), even though the requirement is traversed. Applicant should include a chemical structure (or sequence) of the elected compound if not already contained in the specification.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

To be complete, a response to the election of species requirement should include a proper election along with a listing of all claims readable thereon, including any claims subsequently added. MPEP 809.02(a).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Borin whose telephone number is (571) 272-0713. The examiner can normally be reached on 9am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ardin Marschel, Ph.D., can be reached on (571) 272-0718. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
